# Terms and Conditions

At CodeGhost, we prioritise clarity and professionalism. These terms apply to all our Business Website Plans: Starter, Business, and Premium.

- 1. Domain & Hosting:** All plans include 1-year domain registration and 1-year shared hosting. Hosting panel access (such as cPanel) is only provided in the Premium Plan and must be requested before the project starts or at the time of renewal. Otherwise, setup will incur additional cost as hosting must be configured accordingly. Domain and hosting renewals are billed separately, and the total combined cost for both is typically between ₹4,000 to ₹5,000 per year.
- 2. Email Services:** Business email accounts are not included in any plan. Customers must purchase emails separately from Google Workspace or any provider of their choice. We recommend Google Workspace for its reliability, security, and ease of use. It is billed separately by Google at approximately ₹165 per user/month. For more info visit <https://workspace.google.com/pricing>.
- 3. Theme-Based Development:** All websites are developed on WordPress using ready-made themes. Starter and Business plans include free basic themes, while the Premium plan includes a licensed premium theme at no additional cost. These plans do not include custom UI/UX, Figma/Photoshop design, or advanced coding unless specifically quoted as an add-on service.
- 4. Images & Branding:** Customers must provide product, office, and team images along with their brand logo and any branding references (colors, taglines, fonts, etc.). If a logo is not available, we will include a free placeholder logo using text, icons, or AI-generated visuals. Please note, custom logo design is not part of any plan and is offered only as a paid service.
- 5. Content:** Each plan includes text content writing for the defined number of pages, along with free stock images where client-provided visuals are unavailable. The Premium Plan includes professionally written content with clear, well-structured text and access to high-quality licensed stock imagery, offering a more polished and premium visual experience.
- 6. Page Limitations:** The Starter Plan includes 1 page, the Business Plan includes approximately 4–5 pages, and the Premium Plan includes approximately 5+ pages. Any additional pages, features, or functionality requested beyond the included scope will incur extra charges based on complexity and work involved.
- 7. Additional Pages:** Extra pages beyond the included plan scope will be charged separately. Business Plan pages start at ₹1,500-2,500 per page, and Premium Plan pages start at ₹5,000 per page. Final pricing may vary depending on design or functionality requirements.
- 8. Product Catalog & Listings:** Product or catalog listing setup is not included. We provide login access and basic training so customers can manage their own listings. If you prefer us to handle product uploads, it will be charged separately based on the number of items and required effort.
- 9. Social Media & Third-Party Links:** Customers are required to provide all necessary social media links, WhatsApp contact, addresses, google business profile or third-party integrations at the time of setup. These will be implemented as provided. Any updates or changes requested after project delivery may require a maintenance contract or will be billed separately.
- 10. Policy Pages:** Upon request, we provide standard policy page templates such as Privacy Policy, Terms & Conditions, and Refund Policy. These templates are for general use only and should not be considered legally binding. Clients are responsible for legal verification through professional consultation.
- 11. SEO Services:** SEO is not included in any of the website plans. However, standard SEO best practices will be followed during the development process. All websites will be mobile responsive and built with an SEO-friendly structure to support future SEO implementation.
- 12. Delivery Timeline:** The Starter Plan is delivered in 3–7 business days, the Business Plan in 7–15 business days, and the Premium Plan in 15–25 business days. Delays caused by late submission of content, images, or changes in project scope from the client's side may extend the delivery timeline.
- 13. Maintenance & Support:** All plans include 1 year of basic maintenance — covering security, backups, and plugin/theme updates. Changes to website content, images, or design after launch are not included and will be charged separately based on fixed cost or hourly rate depending on the scope.

Any unspecified terms will be handled at our discretion, with fair intent and consideration for the client's interest and project scope.
